

SCHOOL CLINIC MANAGEMENT

SCM

SCM-School Clinic Management

At EduCure the well being of our students is of utmost importance. We provide nursing services to students and staff members to maximize the general health and wellness. The fully air-conditioned school Infirmary is equipped with beds and all the necessary equipment and facilities to address the immediate health needs while in school.

A qualified and experienced nurse is available on campus to manage and assess any health issues that may arise during school hours. In the event of an emergency requiring medical attention, the student will be shifted to the nearest hospital and parents will be informed of the same. A comprehensive medical record of each student is maintained by the school nurse. Basic first-aid kits have been made available in high risk areas such as the laboratories as well as on the ambulance available.

Need/ Importance of Medical Room

- Any illness/injury is addressed at School itself by an expert.
- Maintenance of Health Records
- Advantage for School as an additional facility for students.
